

Planning is crucial, not just for transitory network outages, but also for recovery from devastating natural disasters. SDN Global has the answer for your power and communications needs. **GenSat®** is designed to get your business back online in minutes.

### RESTORE POWER

**GenSat®** is available in several diesel generator configurations from 60kW to 215 kW and is backed by the Cummins superior warranty that includes over 3000 service centers nationwide.

### RESTORE COMMUNICATIONS

**GenSat®** serves as the ideal disaster recovery communications solution. It can be deployed anywhere, anytime without the limitations of geography or power. As with all SDN units, broadband internet, voice lines, private data networks, WiFi and video conferencing are just some of the features of GenSat® that can assist you with your disaster recovery efforts.
